

Title: IT Architecture – Automation Capabilities and Complex Systems Design

Date: Thursday 12th of September 2019

Time: 0800 Registration – Start 0830–1030

Venue: Ibec 86 Lower Baggot Street, Dublin 2

Overview:

Technology Ireland ICT Skillnet in collaboration with IASA Global, the professional body of IT Architects (<https://iasaglobal.org/>), IASA Ireland (<https://www.iasa.ie/>) and Enterprise Blueprints (<https://enterpriseblueprints.com/>) are running a breakfast seminar on Architecture & Automation in Dublin on the morning of the 12th of September 2019.

Why Attend:

You are invited to join us for this breakfast briefing as we examine the changing world of IT Architecture and automation capabilities in organisations leveraging technology to transform their businesses.

Architecture & Automation – a panacea for ‘heritage’ systems or cementing your debts
We will unpack automation and along the way we will pose the question “*is RPA just life support for your ‘heritage’ systems?*” and if so “*what is your & their quality of life worth?*”. We will also discuss the impact of complexity on architecture and introduce strategies for better options analysis and design of complex systems

Gar Mac Críosta, Chief Adventurer – Business Model Adventures

Is Cost Reduction a Priority? RPA alone is not the Silver Bullet

Robotic Process Automation is one tool in a broader set of automation capabilities including cognitive technologies and machine learning. The correct use of these technologies combined with E2E process design principles can help transform businesses by reducing costs and increasing revenue.

Neil Mulholland, CEO of Enterprise Blueprints

This briefing will appeal to CTOs/CIOs/Chief Architects/Architects/Heads of Innovation and Business Leaders. The briefing will appeal to all industries but will also have specific focus examples around financial services organisations

Agenda

0800-0830	Teas/Coffees
0830-0835	Welcome – Dave Feenan Innovation Programmes Manager ICT Skillnet
0835-0855	Introduction, Speakers, Topics and IASA Global - Leo Peyton
0855-0910	IASA Ireland Community & MSc Applied IT Architecture - Cormac Keogh
0910-0940	Architecture & Automation – A Panacea for ‘Heritage’ Systems or Cementing your Debts – Gar Mac Críosta, Business Model Adventures
0940-1010	Automation Capabilities – Is Cost Reduction a Priority? RPA alone is not the Silver Bullet – Neil Mulholland, CEO of Enterprise Blueprints.
1010-1030	Q&A Panel Discussion – IT Architecture & Automation Capabilities
1030-1030	Close
